PROFESSIONAL OBJECTIVE

Interested in a challenging position as a UI Developer in a dynamic, inspiring and creative environment that will allow me to make use of my clean, user-friendly and simple aesthetic interface design and front-end engineering with main focus on usability, accessibility and standards compliant output.

SYNOPSIS

- ✓ 8+ year's Front-end experience and a proven track record designing successful, compelling, and consumer-focused web applications.
- ✓ A keen developer with expertise in using Open Source technology and rich UI development emphasizing on pixel-perfect implementations, modern programming methodologies and useful interaction design.
- ✓ Strong understanding and ability to implement a wide breadth of front-end technologies such as HTML5, CSS3, and Advanced JavaScript libraries/Frameworks like JQuery/AngularJS/ReactJS to enhance the user experience of a web site, application, or consumer product.
- ✓ Working experience with PHP, including the ability to write and execute complex MySQL queries.
- ✓ A self starter with an aptitude for understanding business processes and learning new skills quickly, and the ability to manage different responsibilities/tasks simultaneously with an eye for details. Logical, analytical thinking.
- ✓ Always willing to walk extra mile for the team, flexible with often-not-so interesting work given the importance of work.
- ✓ Social media enthusiast with passion for blogging, digital marketing, technology and the latest web trends.
- ✓ Passionate to positively push the web development and user experience to next level, and hone my existing skills and competency to have the extra edge over the others.

EDUCATION

- ✓ Masters of Computer Applications with 75% under Anna University in 2008.
